

Table 1: The three quartiles (second to fourth row) and the average (fifth row) of  $b_{CV}$  from 500 replications for each window and model. The first row indicates the optimal bandwidth.

	$D = [-5, 5]^2$			$D = [-10, 10]^2$			$D = [-20, 20]^2$		
	M1	M2	M3	M1	M2	M3	M1	M2	M3
$b_{opt}$	0.50	0.50	0.50	0.37	0.37	0.37	0.29	0.29	0.29
Q1	1.13	1.06	1.08	0.59	0.54	0.55	0.37	0.28	0.28
Q2	1.51	1.18	1.18	0.76	0.60	0.60	0.40	0.30	0.30
Q3	1.88	1.55	1.53	0.84	0.77	0.75	0.40	0.32	0.30
Mean	1.61	1.26	1.29	0.80	0.66	0.65	0.39	0.31	0.30
